TESTIMONIAL

"It is a pleasure working with iTech! We are a small behavioural health provider in Georgia and have had difficulty finding a billing solution that provides prompt payment by insurance companies and an integrated billing solution for an affordable rate. We have never had claims paid so consistently since using the expEDlum billing solution and claims portal! iTech consistently responds to our questions and training needs, no matter what time of day or evening. I have truly never received such excellent service! I give iTech permission to provide my contact information to anyone interested in using their services."
